Project Scope

In Scope

- A way to log a user's current feeling.
- A calendar view to track how a user's feelings were over a course of time.
- Allow users to add a short note, journal entry with each mood log.
- Provide simple mood trends over a period of time.
- Provide basic user account login.

Out of Scope

- Therapist portal.
- An AI chatbot to help people log feelings.
- Integration with external factors for therapy or mental health services.
- Emergency or crisis intervention services.
